

THANKS! AND KEEP READING

It's been a year since I earned the designation Certified Medicaid Planner™ and we began these monthly columns in local papers. We've grown and helped spouses and families preserve resources when faced with the devastating costs of nursing home care. We have developed a working relationship and positive rapport with DHS caseworkers in various counties.

Although these articles are short and can only address the broadest issues of Medicaid planning we receive positive feedback from our clients who have found this information to be pertinent and helpful. We are humbled and gratified when folks bring our cutout newspaper columns with them to appointments. If you think you may have missed an article or want to review them they're all posted on our website at www.Greevy.com. If you have a suggestion for a topic that interests you relating to Medicaid planning we'd like to hear from you. And if you'd like copies of any columns please feel free to call.

We always approach Medicaid planning on a matter by matter basis because there is no one-size-fits-all model during this intricate process. Thanks for reading, and remember, Greevy and Shoemaker and their Certified Medicaid Planner™ are dedicated to working for you and your family to preserve your resources for a reasonable fee.
